

Texas Risk and Authorization Management Program Certification

The information below is provided as a companion to the TX-RAMP Certification.

Cloud Service Name

TimeClock Plus: Humanity

Cloud Service Provider URL

Cloud Service Description (200 words or less)

Humanity.com, Inc. (Humanity) provides cloudbased employee scheduling and time-tracking software services. In December of 2020, TimeClock Plus, LLC (TCP) acquired Humanity. As the parent organization, TCP provides management controls to Humanity, its subsidiary. The Humanity platform is designed to simplify day-to-day employee scheduling. The platform helps Humanity customers create error-free, dynamic staffing schedules easily and accurately based on location, department, position, and skills. The platform provides real-time availability and conflict checking to streamline the scheduling process. The Humanity platform integrates with industry-leading human capital management (HCM) platforms and can be integrated with the TCP platform for time-tracking capabilities, leave management, reporting, and payroll integrations. The bi-directional software integration between the Humanity platform and the TCP platform.
